Computer science graduate (AIUB, 2026). Websites in HTML, CSS and JavaScript. Scripting, editing and scheduling short-form video for a US creator brand since April 2026.

SOCIAL MEDIA MANAGEMENT

Billy Coder (Jamison Williams)

Apr 2026 - Present

Social media and content manager, remote

REELS

- Wrote 33 short-form reel scripts for Instagram @billy.coder from reference reels and GitHub projects, checking every number and licence against the live source.
- Built a local Python editing pipeline (FFmpeg, faster-whisper, Playwright, PyTorch matting, edge-tts) that trims the phone take, adds screen footage and word-synced captions, and exports 1080x1920. Finished 20 reels with it; at least 4 are posted on Instagram.
- Ran the comment-keyword DM funnel: wrote 24 DM guides and rebuilt a ManyChat auto-reply flow that had been deleted.
- Built an Airtable table of 13 competitor Instagram accounts, wrote 20 scripts modelled on their best reels, and read post data from the Zernio analytics API when picking topics.

UGC ADS

- Scripted 17 AI UGC ad concepts for a US cash home-buying company and finished 20 to 23 second cuts for 3 of them.
- Made the avatars in Nano Banana Pro and the talking clips in Gemini Omni and Seedance 2.0 through Kie.ai, cloned the voice in Chatterbox, and cut and captioned in FFmpeg.

LINKEDIN, POSTS AND SKOOL

- Made LinkedIn carousels for Jamison's profile (posted May to June 2026) and scheduled image posts to Instagram, Threads, TikTok and X through the Zernio API.
- Edited lesson videos for the brand's Skool community.

Bangla video ad, Bangladeshi software company

Sep 2026

- Made a 16-second faceless ad from its own site footage, with a free Bangla voice (edge-tts).

WEB DEVELOPMENT

Websites and web apps

Mar 2026 - Present

Own projects: redesigns, templates and demos

- Built 63 websites and web-app demos: 33 redesigns of real local businesses (spa, wellness and trades), 18 niche templates and 12 demos. 25 of the redesigns are live on Vercel.
- Plain HTML, CSS and JavaScript, with Leaflet maps, before/after sliders and JSON-LD reviews.
- Wrote a rule-based chat widget with no dependencies and two modes, used on 77 pages.
- Added 18 niche templates and 5 variants to a third-party site kit (beautiful-websites-kit).
- Hargrove Plumbing demo: an Express 4 booking backend with Zod validation, Nodemailer and rate limiting, split into routes, controllers, services and validators.
- Portfolio: a black-and-white site with Three.js pieces, tested in Chromium and WebKit.

Prospecting for redesign outreach

Jun 2026

- Pulled 27 Austin-area med spas with Apify and qualified 23 from Playwright screenshots.
- Built a redesign demo and drafted an outreach email for 16, tracked in Airtable.

Claude Code skills and agents2026

- Wrote the reel-production skills (Viral-Video-Maker, reel-factory, reel_script, Reel_direction, game-reel, Skool_video_Maker). Viral-Video-Maker made 15 faceless reels in July 2026.
- Built a five-agent website team on top of the ui-ux-pro-max skill, with a 367-line AI-tell scanner and a 266-line browser checker.
- Wrote a 464-line Python scaffold tool that lays out a project's folders before any code, added to an MIT-licensed architecture skill.
- Wrote a 216-line Python script that clones an Airtable base schema through the Metadata API, in three passes within the rate limit.

OTHER EXPERIENCE

Trust Bank PLC, IT DivisionDec 2025 - Mar 2026

IT network intern, Dhaka

- Three months with the IT Network Team on the bank's production network.
- Worked on static and dynamic routing, VLAN segmentation and tunnel interfaces on production routers and switches.
- Administered devices over SSH and wrote network documentation in the team's format.

EDUCATION

American International University-Bangladesh (AIUB)Apr 2026

B.Sc. in Computer Science and Engineering

- Group thesis (four authors): Diabetes Prediction for the Bangladesh Population: Bio-Inspired Optimization of ML Classifiers on the DiaBD Dataset.
- Compared 15 classifiers on 5,288 patient records with a 14.5:1 class imbalance, balanced the classes with SMOTE, ADASYN and SMOTE-ENN, and tuned the models with Particle Swarm, Ant Colony and Harris Hawks optimisers written from scratch.
- Coursework: data structures and algorithms, databases, computer networks, operating systems, software engineering, web technologies, machine learning.

SKILLS

WEB	HTML, CSS, JavaScript, Leaflet, Node.js and Express, Git, Vercel. Some work in React, Next.js, TypeScript, Tailwind and Three.js.
VIDEO AND SOCIAL	FFmpeg, faster-whisper, edge-tts, Playwright screen capture, ManyChat, Zernio API, Canva.
AI TOOLS	Claude Code (skills and agents), Nano Banana Pro, Seedance 2.0, Gemini Omni, Kie.ai, Chatterbox.
DATA	Python, pandas, NumPy, scikit-learn, XGBoost, LightGBM, Apify, Airtable REST and Metadata APIs.
NETWORKING	TCP/IP, routing and switching, VLANs, SSH.
LANGUAGES	Bengali (native), English (professional).
